Online Score Report

Go online to get more details about your performance, including areas of strength, and check out the action steps in Skills Insight to help you boost your college readiness.

How Did I Score Compared to Others?

A percentile is a number between 1 and 99 that shows how your score ranks compared to other students. It represents the percentage of students whose scores are equal to or below yours. For example, if your Math score percentile is 57 that means 57 percent of test-takers have Math scores equal to or below yours.

You'll see two percentiles:

The Nationally Representative Sample Percentile shows how your score compares to the scores of all U.S. students in your grade, including those who don't typically take the test.

SAT[®] User Percentile — National shows how your score compares to the scores of students who typically take the test.

Will My Scores Change and Why?

Tests are not exact measures, and many factors can affect your score. After all, no two days are the same, and if you took the SAT once a week for a month your scores would change.

That's why it helps to think of your true score as a range from a few points below to a few points above the score earned. Score ranges show how your score can change with repeated testing, assuming your skill level remains the same.

Usually, scores for Evidence-Based Reading and Writing and for Math fall in a range of roughly 30 to 40 points above or below your reported score.

Total: Your score \pm 40 points.

Section: Your score \pm 30 points.

Test Scores and Cross-Test Scores:

Your score \pm 2 points.

Subscores: Your score \pm 2 points.

Am I on Track to Be Ready for College?

You'll see a benchmark score for each section of the SAT. Benchmarks show your college readiness. The Evidence-Based Reading and Writing benchmark is 480 while the Math benchmark is 530. This means if you score at or above the benchmark, you're on track to be ready for college when you graduate high school. If you score below the benchmark, you can still get back on track by focusing on areas where you didn't perform well. Use the detailed feedback in your online score report to see which skills you need to work on most.
